OFFICIAL SERVICE

MISSION AND PHILOSOPHY

BRAČA-SPORT® mission and philosophy is to design, develop and produce the best performing paddle for every paddler. We believe that each paddler has different needs and therefore each paddle should be uniquely designed. Different designs work better for different paddlers and environments. Our goal is to continue research, development and creation of a diverse range of products that satisfy the vast variety of paddlers. We are the only manufacturer to engineer paddles in every paddling category: Canoe Polo, Dragon Boat, Flatwater, Freestyle, Marathon, Ocean Racing, Outrigger, Slalom, Touring, Waveski and Wildwater. With a total of 130 different canoe and kayak paddles with over 400,000 configurations we have the right paddle for everyone.

Our paddles have been designed using the latest technology available, inspired by the comments and in collaboration with some of the world's most successful paddlers and coaches. We invented the revolutionary 'tear-drop' blade concept that redefined paddle performance and is now being copied by other manufacturers. This has become the 'de facto' blade in the paddling community and the world's only mechanical energy paddle concept.

We are the only manufacturer to engineer and produce carbon fabrics and paddles. This provides the ability to produce a very specific and fine grain unidirectional high modulus carbon (HMC) fabric layers in contrast to what is available in the market. The diverse range of specific and fine grain materials is the key improvement enabler of the paddle's performance characteristics.

OLYMPIC GAMES AND WORLD CHAMPIONSHIPS MEDALS WON BY ATHLETES USING BRAČA-SPORT PADDLES

Together with proprietary multi-layer and multi-characteristic lay-up methods of a proprietary blend of composite fibers and a reinforced proprietary UV epoxy resin provides the ultimate mechanical and kinetic capabilities. This enables desired catch, slip, pull-through, flutter and acceleration of the paddle and guarantees these characteristics for every paddle produced, yielding the world acclaimed mechanical energy BRAČA-SPORT® paddle.

BRAČA-SPORT® was first to develop and produce paddles specifically designed for children and youth. Our proprietary material characteristics and mechanics of the paddle are specifically designed to fit children's physiology. It enables to absorb the impact from each paddle stroke, therefore reducing shock on the shoulders, elbows and wrists and ultimately decreasing common kayak injuries. The above technology methods are also used to design and develop paddles for recreational and senior paddlers.

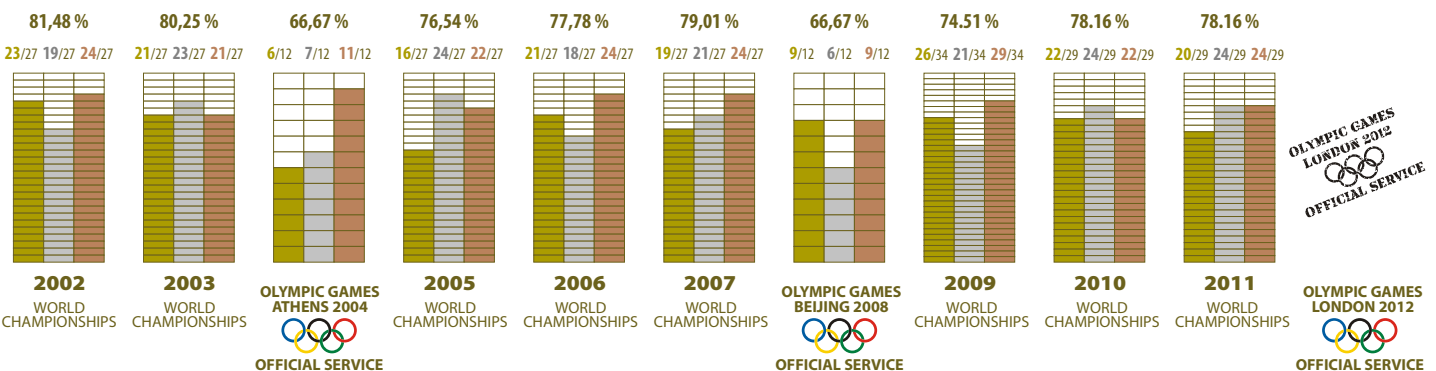

KEY FACTS

- Original inventor of the 'tear-drop' concept.
- The only manufacturer to engineer and produce carbon fabrics and paddles.
- World's first and only mechanical energy paddle.
- More than 300 years of combined engineering experience, including aerospace, advanced composite materials science, biomechanics and kinetics, mechanical, electrical, chemical and software engineering.
- Built to suit different styles, techniques and physical characteristics of each paddler.
- First to develop and produce paddles specifically designed for children and youth.
- Designer, developer and producer of the largest paddle selection in the world.

RESULTS

- Used at every level, from world class athletes to children and recreational paddlers.
- Superb durability and outstanding performance.
- Over 750 Olympic Games and World Championships medals.
- The lowest breakage rate in the industry.
- The majority of today's world class paddlers make BRAČA-SPORT® their #1 choice.

BRAČA I

Brača I max
Brača I Marathon max
Brača I Extra Light max
Brača I min
Brača I Marathon min
Brača I Extra Light min
Brača I s-min
Brača I Extra Light s-min

Brača I, IV and **FW** are the original world's first 'tear-drop' design and our most widely used paddles. The paddles are designed to facilitate application of the power in the beginning (catch) and in the middle of the stroke, enabling capabilities to obtain the "ultimate" forward stroke

Brača I and **Brača IV** are available with Marathon blade construction. This is a result of advanced technology, a proprietary blend of composite materials and was designed with the marathon and adventure paddler in mind. The edge of the blade is reinforced with a kevlar layer that makes it highly impact resistant in extreme down river conditions.

Brača I and **Brača IV** are available in the extra light and stiff construction for the athlete who prefers light and stiff characteristics.

BRAČA IV

Brača IV max
Brača IV Marathon max
Brača IV max 60
Brača IV Extra Light max
Brača IV min
Brača IV Marathon min
Brača IV min 60
Brača IV Extra Light min
Brača IV s-min
Brača IV s-min 60
Brača IV Extra Light s-min

Brača IV 60 is designed for the paddler who prefers a softer blade and shaft.

Brača Children is an exact copy of the **Brača I** and **Brača IV** with proportionally smaller blade size and with proprietary material characteristics and mechanics of the paddle that are specifically designed to fit children's physiology. It enables absorption of impact from each paddle stroke, therefore reducing shock on the shoulders, elbows and wrists and ultimately decreasing common kayak injuries.

TEAR-DROP MODELS

BRAČA II

- Brača II max
- Brača II Extra Light max
- Brača II min
- Brača II Extra Light min
- Brača II s-min
- Brača II Extra Light s-min

Brača II is based on **Brača I** design, it has an increased blade pitch (see diagram below), which provides a firmer 'catch' and more effortless exit than **Brača I**.

Brača II is available in the extra light and stiff construction for the athlete who prefers light and stiff characteristics.

$$\alpha_1 < \alpha_2 \text{ and } \beta_1 < \beta_2$$

BRAČA VIII

- Brača VIII x-max
- Brača VIII max
- Brača VIII min

Brača VIII is a line of Brača paddles, based on the latest innovative blade concept.

It was designed and engineered to facilitate a softer catch and generation of the smooth, precise and consistent strokes.

Brača VIII is available in three blade sizes *min*, *max* and *x-max* to match the performance requirements of the vast variety of athletes.

TECHNICAL PARAMETERS OF TEAR-DROP MODELS

	Blade			Shaft			Carbon content (%)		Weight (g/oz)	Extra Light model Weight (g/oz)

BRAČA III

Brača III
Brača III 60

Brača III is the 'parallel-edge' model and is the preferred paddle of lighter male athlete.

Brača III 60 is designed for the paddler who prefers a softer blade and shaft.

BRAČA V

Brača V is the latest update of the traditional 'parallel edge' concept, recommended for paddlers who prefer this shape to the more aggressive 'tear-drop' shape.

BRAČA KID

Brača Kid max
Brača Kid min
Brača Kid s-min

Brača Kid is a 'parallel-edge' blade with proportionally smaller blade size and with proprietary material characteristics and mechanics of the paddle that are specifically designed to fit children's physiology.

It enables absorption of impact from each paddle stroke, therefore reducing shock on the shoulders, elbows and wrists and ultimately decreasing common kayak injuries.

TECHNICAL PARAMETERS OF PARALEL-EDGE MODELS

	Blade			Shaft			Carbon content (%)		Weight (g/oz)
	Surface Area (sq.cm/sq.in)	Length (cm)	Width (cm)	Keular Tips	Stiffness (mm)	Full Adjustable 4 pc split	Blade	Shaft	
Brača III	755/117.0	53.0	15.5		2.5 - 2.6	o o	100	100	750/26.5
Brača III 60	755/117.0	53.0	15.5		3.2 - 3.4	o o	50	60	850/28.3

Brača Kid s-min	580/89.9	45.2	13.3		4.7 - 4.9	o o	50	60	700/24.7

EXTREME TEAR-DROP MODELS

BRAČA VI

Brača VI max
Brača VI min
Brača VI s-min

Brača VI and **Brača VII** are designed with more extreme 'tear-drop' shape, which facilitates a very powerful catch.

This design facilitates application of all power in the beginning of the stroke (catch) only. In these models the blade is fitted into the shaft.

BRAČA VII

Brača VII max
Brača VII min
Brača VII s-min

Brača Junior is an exact copy of the **Brača VI** and **Brača VII** with proportionally smaller blade size and with proprietary material characteristics and mechanics of the paddle that are specifically designed to fit children's physiology.

It enables absorption of impact from each paddle stroke, therefore reducing shock on the shoulders, elbows and wrists and ultimately decreasing common kayak injuries.

BRAČA JUNIOR

Brača Junior max
Brača Junior max 100
Brača Junior min
Brača Junior min 100

Brača Junior 100 is also available in standard (100% carbon) construction.

TECHNICAL PARAMETERS OF EXTREME TEAR-DROP MODELS

	Blade			Shaft			Carbon content (%)		Weight (g/oz)
	Surface Area (sq.cm/sq.in)	Length (cm)	Width (cm) Kevlar Tips	Stiffness (mm)	Full Adjustable	Blade	Shaft		
Brača VI max	780/120.9	52.0	17.5	2.7 - 2.8	o o	100	100	750/26.5

Brača Junior min	665/103.1	48.4	15.2	3.2 - 3.4	o o	50	60	800/28.2	
Brača Junior min 100	665/103.1	48.4	15.2	2.7 - 2.9	o o	100	100	600/21.2	

BRAČA IX

Brača IX max
Brača IX min

Brača IX and **Brača X** is the line of Brača paddles, engineered using advanced kinetic, biomechanical and material science concepts to combine the best characteristics from multiple paddle designs into one hybrid model.

The revolutionary idea enables the paddle to provide different characteristics during each phase of the stroke (catch, drive and exit).

BRAČA X

Brača X max
Brača X min

It has a very firm catch, and then transitions to the smooth medium power drive and effortless and forgiving exit.

TECHNICAL PARAMETERS OF HIBRID (FUSION) MODELS

	Blade			Shaft			Carbon content (%)		Weight (g/oz)
	Surface Area (sq.cm/sq.in)	Length (cm)	Width (cm) Kevlar Tips	Stiffness (mm)	Full Adjustable 4 pc-split	Blade	Shaft

BRAČA CANOE GERE

Brača Canoe Gere Standard
Brača Canoe Gere Hard

Brača Canoe Gere Standard - designed using production techniques derived from many decades of experience delivering functionality to satisfy the requirements of the majority of athletes.

Brača Canoe Gere Hard - designed for the strong (90 kg / 198 lb plus) athlete, with added stiffness and is slightly heavier.

BRAČA CANOE GERE

Brača Canoe Gere Neptun

Brača Canoe Gere Neptun - a unique design with the highest possible performance.

Lacquered and highly polished blade surface, pronounced shaping and the use of top quality materials give this blade superb finish and its outstanding properties.

TECHNICAL PARAMETERS OF CANOE GERE MODELS

	Surface Area (sq.cm/sq.in)	B l a d e		N e c k			S h a f t			Weight (g/oz)	
		Length (cm)	Width (cm)	Wooden	Glass Fiber	Carbon	Stiffness (mm)	Carbon content (%)	Adjustable

CANOE MODELS

BRAČA CANOE

Brača Canoe 20
Brača Canoe 21.5

Brača Canoe 20 and **Brača Canoe 21.5** are an exact copy of the wooden blade paddle (see previous model **Brača Canoe Gere**).

This paddle has the same grip as a wooden paddle; with higher outer mechanical strength and impact resistance

BRAČA CANOE MEDIUM

Brača Canoe Medium
Brača Canoe Uni 2000

Brača Canoe Medium is designed with a stabilizing central spline on the blade. It has a specific, non-uniformly distributed catch.

This shape allows the paddler to perform the most effective straight strokes (it doesn't 'run aside') and steering against the wind becomes less complicated.

Brača Canoe Uni 2000 uses the same shape as **Brača Canoe Medium** but has a wide range of sizes.

Size must be specified when ordering.

TECHNICAL PARAMETERS OF CANOE MODELS

CANOE MODELS

BRAČA CANOE CHILDREN

Brača Canoe Children is an exact copy of the **Brača Canoe Uni 2000** with proportionally smaller blade size and with proprietary material characteristics and mechanics of the paddle that are specifically designed to fit children's physiology.

It enables absorption of impact from each paddle stroke, therefore reducing shock on the shoulders, elbows and wrists and ultimately decreasing common canoe injuries.

BRAČA CANOE UNI EXTRA WIDE

Brača Canoe Uni Extra Wide is the line of Brača canoe sprint paddles designed and engineered to enable a very quick and powerful catch. This design facilitates application of all power in the beginning of the stroke (catch) and an effortless exit.

BRAČA CANOE UNI SUPER FAT

Brača Canoe Uni Super Fat is the new line of Brača canoe sprint paddles designed and engineered to enable a quick, powerful and very smooth catch. This design facilitates application of all power in the beginning of the stroke and an effortless exit, while preventing stress to the hand and wrist by absorbing the entrance shock, therefore making the catch extremely smooth and efficient.

BRAČA TYPHOON

Brača Typhoon 20
 Brača Typhoon 60
 Brača Typhoon 100

Brača Typhoon has been designed to provide well balanced characteristics of lightness, ease of use and extreme durability.

The Typhoon has a very clean center spline, incorporated into the blade for optimal tracking stability.

Its exceptional strength fully withstands intense conditions and performs flawlessly in the open ocean, rivers and lakes.

BRAČA TORNADO

Brača Tornado 20
 Brača Tornado 60
 Brača Tornado 100

Brača Tornado is our non-spline paddle model.

It is designed to provide very clean and efficient paddle strokes, delivers increased power for acceleration and is optimized for work in the surf zone.

Its exceptional strength fully withstands intense conditions and performs flawlessly in the extreme conditions of the open ocean.

- Brača Hurricane 20 min
- Brača Hurricane 60 max
- Brača Hurricane 60 min
- Brača Hurricane 100 max
- Brača Hurricane 100 min

Brača Hurricane is the latest paddle in the Brača touring line.

Its design is based on the Typhoon, with the following modifications: slightly reduced blade surface area and offset spline height to provide more efficient catch, tracking and exit.

Its exceptional strength fully withstands intense conditions and performs flawlessly in the open ocean, rivers and lakes.

This is a perfect paddle for touring and long races for the paddler who prefers a traditional shape over a wing blade.

All traditional sea kayak models have carbon reinforced tips.

TECHNICAL PARAMETERS OF TRADITIONAL MODELS

	Blade			Kevlar Tips	Shaft			Carbon content (%)		Weight (g/oz)

BRAČA SLALOM KINETIC

Brača Slalom Kinetic is a strong, tough and durable paddle with aluminum reinforced tips for added impact resistance.

BRAČA SLALOM SOČA

Brača Slalom Soča max
Brača Slalom Soča min

Brača Slalom Soča is the line of Brača kayak slalom and freestyle paddles designed and engineered to enable fast, firm and smooth insertion into the water and an extremely efficient stroke. The blade has a unique spoon-leaf shape with sharp edges, CNC core worksheet of very durable and tough core, sandwich titanium stiffener and 12 mm wide solid edge High Modulus Unidirectional Carbon throughout the end of district.

Our revolutionary molding technology process assures that the blade shape is intact and guarantees production of all paddles to be identical and precise. The paddle is intended for hard driver, who loves the feeling of water in the shot.

SLALOM AND FREESTYLE MODELS

BRAČA SLALOM SJOA

Brača Slalom Sjoa max
Brača Slalom Sjoa min

Brača Slalom Sjoa is the new line of Brača kayak slalom and freestyle paddles designed and engineered to enable a very fast and effective management of the stroke and maneuverability. This design facilitates the ultimate control of the stroke in every phase.

The blade has flat surface in two horizontal and vertical lines, CNC core worksheet of very durable and tough core, sandwich titanium stiffener and 12 mm wide solid edge High Modulus Unidirectional Carbon throughout the end of district. Our revolutionary molding technology process assures that the blade shape is intact and guarantees production of all paddles to be identical and precise.

DOWN RIVER MODELS

BRAČA DOWN RIVER

Brača Down River is the new line of Brača paddles designed, constructed and optimized specifically for downriver competition. It was engineered to facilitate a very sharp catch enabling quick and maximum velocity control of the boat.

Brača Down River is available with stiff and soft shaft construction options. The edge of the blade is reinforced with a kevlar layer that makes it highly impact resistant in extreme down river conditions.

BRAČA IV

Brača IV Marathon max
Brača IV Marathon min

Brača IV are available with Marathon blade construction. This is a result of advanced technology, a proprietary blend of composite materials and was designed with the marathon and adventure paddler in mind. The edge of the blade is reinforced with a kevlar layer that makes it highly impact resistant in extreme down river conditions.

TECHNICAL PARAMETERS OF DOWN RIVER MODELS

BRAČA CANOE SLALOM ROCKY

Braća Canoe Slalom Rocky 1 max
Braća Canoe Slalom Rocky 1 min
Braća Canoe Slalom Rocky 2 max
Braća Canoe Slalom Rocky 2 min

Braća Canoe Slalom Rocky was engineered using advanced kinetic, bio-mechanical and material science concepts to produce the strongest and lightest paddle possible, matching the performance and durability requirements of a vast variety of athletes. The blade has an aluminum-titanium alloy reinforced tip and 12 mm wide solid edge High Modulus Unidirectional Carbon throughout the end of the edges for added impact resistance. Our revolutionary molding technology process assures that the blade shape is intact and guarantees production of all paddles to be identical and precise.

BRAČA DOWN RIVER CANOE ON ROLL

Braća Down River Canoe ON Roll is the new line of Braća down river paddles designed and engineered to enable a very fast and effective management of the stroke and maneuverability.

It was constructed to be extremely light and durable. The blade has a CNC PVC foam worksheet of very durable and tough core, sandwiched aluminum-titanium alloy stiffener and 12 mm wide solid edge High Modulus Unidirectional Carbon throughout the end of the edges. Our revolutionary molding technology process assures that the blade shape is intact and guarantees production of all paddles to be identical and precise.

Braća Slalom, Freestyle and Down River Canoe Shafts are designed and engineered specifically for each canoe discipline. These are the recommended shafts for corresponding disciplines:

- Soft Standard* and *Soft Minus* – designed for Down River
- Medium minus (29mm)* – designed for Down River
- Medium minus (31 mm)* – designed for the C-1 paddler

Medium Standard – designed for the C-2 bow paddler

Medium Plus – designed for the C-2 stern paddler

Hard Standard and *Hard Plus* – designed for the heavier C-2 stern paddler

CANOE POLO MODELS

BRAČA POLO SPOON

Brača Polo Spoon is recommended for defensive play and for goaltenders. It has superb ball handling ability.

Because of the nature of their use, these paddles are made from highly impact resistant materials. The blade has an impact resistant edge all around and is filled with reinforced Polystyrol foam.

BRAČA POLO KINETIC

- Brača Polo Kinetic max
- Brača Polo Kinetic min
- Brača Polo Kinetic 60 max
- Brača Polo Kinetic 60 min

Brača Polo Kinetic has unique non-slip bands on the blades to enable extra control when handling the ball. It is ideally suited for offensive play with excellent sprint characteristics and ball control.

Because of the nature of their use, these paddles are made from highly impact resistant materials. The blade has an impact resistant edge all around and is filled with reinforced Polystyrol foam.

TECHNICAL PARAMETERS OF CANOE POLO MODELS

SHAFTS

ADJUSTABLE SHAFT SYSTEM II

System II for kayak paddles

System II for canoe and Stand UP paddles

ADJUSTABLE SHAFT SYSTEM III

System III for children canoe paddles

System III for Dragon and Outrigger paddles

All kayak, canoe and Stand UP (SUP) paddles are available with the adjustable shaft option **System II**. **System III** option is used for Children Canoe, Dragon and Outrigger paddles.

Adjustable system allows elegant adjustment of feathering angle from 0° to 80° right or left in 5° increments.

Both adjustable shaft systems approximately add 40 g / 1.41 oz to the paddle weight.

SPLIT SHAFT SYSTEM

Sea kayak and touring paddles are available with a two piece split shaft option.

The system adds approximately 20 g / 0.7 oz to the paddle weight.

SHAFT STIFFNESS MEASUREMENT PROCESS

IMPORTANT NOTICE:

! *If used in salt water conditions the paddle should be thoroughly rinsed in fresh water immediately after use.*

If used in fresh water conditions, the paddle should be thoroughly rinsed and cleaned every two weeks.

**HUNGARY CANOEIST GABOR RAKONCZAY
COMPLETED ATLANTIC TREK**

The boat and her sailor

The sea-going canoe:

One-man (single-handed) ocean canoe fitted with keel.

Designed and built by: Nandor Fa and Fa Hajó Ltd

Key details:

Weight: 200 kg (net), about 450 kg (gross) (444/1000 lbs)

Length overall: 7.5 m (24'8")

Maximum beam: 1.2 m (3'11.2")

Draft: 1 m (3'3.4")

Keel: 30 kg (67 lbs)

The crew:

Gabor Rakonczay: male member of the first Hungarian double-handed Atlantic crossing rowing expedition, with rowing and sailing experiences of thousands of nautical miles behind him. He trained Sarah Outen who was rowing across the Indian Ocean with 3 world records.

Equipment:

2 carbon fiber reinforced Braća Outrigger canoe paddles

Hand-held water maker (Katadyn 35)

Iridium satellite phone

2 waterproof, shockproof military notebook (M34 and CF-18)

2 handheld GPS

EPIRB

Inverter

Argos buoy (tracking system)

Wind Indicator

Magnetic compass

Radar Reflector

Position lights

Waterproof digital camera

Waterproof videocamera

2 head torches

Ropes

Flags

Long lasting, rechargeable batteries

GPS Chart Plotter

And many more ...

After 76 days, Gabor Rakonczay – isolated and incommunicado for nearly 50 of those after his canoe capsized –

has become the first person to paddle across the Atlantic Ocean from Europe to the Caribbean.

ACCESSORIES

BRAČA COVERS FLAT

To protect paddles from damage, we offer covers made of special, highly durable fabrics, constructed with tear-resistant micro ripstop nylon and closed-cell foam padding.

The covers are stitched with heavy duty thread, reinforced ends and heavy duty zippers.

The Brača-Sport Universal paddle cover adapts to fit different blade sizes, shaft types (*full, split and adjustable*) and adjusts to accommodate different shaft lengths.

BRAČA COVERS WILD

	Material	Length (cm)
Universal Kayak Cover	Nylon	200 - 227
Universal Canoe Cover	Nylon	155 - 190
Universal Dragon Cover	Nylon	120 - 135

BRAČA HI-TECH SHIRT

The ultimate technical shirt for kayaking, canoeing and other activities. Features comfortable protection combined with lightweight, moisture-wicking, highly breathable fabric for the ultimate racing, training and recreational experience.

Fabric wicks moisture away from the body and allows you to dry quickly when you sweat or when you get wet.

Brača High-Tech T-shirt	Material	Sizes							
		XXS	XS	S	M	L	XL	XXL	XXXL
Men's	DryClim		+	+	+	+	+	+	+
Women's	DryClim		+	+	+	+	+		
Boy's	DryClim	+	+	+					
Girl's	DryClim	+	+	+					

BRAČA PERFORMANCE SHIRT

The BRAČA-SPORT® Performance Thermal shirt is engineered for high-performance workouts and competition and offers a unique balance between zoned thermal compression and ventilation and provides superior moisture management capabilities.

- Provides enhanced airflow and highly breathable.
- Transports moisture away from the body and keeps the skin dry.
- Reduces skin temperature during intense workout and competition.

Sizes: XS, S, M, L, XL (Unisex).

BRAČA POGIES

Brača-Sport Pogies provide water and wind protection for your hands while still allowing direct hand contact with your paddle.

ACCESSORIES

BRAČA BACKPACK

This high-performance technical pack designed for carrying all your daily essentials belongings with ease.

- Panel-loading main compartment offers plenty of room for gear and clothing
- Dual side mesh water bottle pockets to keep bottles from bouncing around
- Adjustable padded shoulder straps and padded backpanel offer load-carrying comfort

BRAČA SPRYSKIRT

Brača-Sport spry skirts designed to fit all ICF and most fitness touring kayaks and have been tested by Brača's R&D team in all weather conditions.

- Features a wide comfortable neoprene and Velcro® adjustable waistband.
- Durable mid-weight nylon is coated for total water resistance.
- Strong bungee rim gripping system secures skirt firmly to the cockpit.
- Double-stitched construction with sealed seams ensures long-lasting wear and water resistance.

BRAČA CAP

Brača-Sport Cap is great fitting and perfect for everyday and after sport use.

- 100% cotton construction is durable and comfortable for long-lasting wear.
- Velcro® closure quickly adjusts to the right size for your head.
- Anti-glare lower brim eliminates light reflection and distraction.
- Low-profile, relaxed fit is perfect for both men and

BRAČA CANOE KNEE PAD

Brača Canoe Knee Pad made from lightweight and durable closed mini-cell foam that can be shaped for a custom fit and superior comfort.
