May 12, 2014

To the Paddling Community,

Van Dusen Racing Boats, a division of Composite Engineering, Inc., is pleased to announce that Braca Sport LTD has purchased a license from us to manufacture and sell worldwide our #8 Kayak Paddle design. This paddle was first produced in 1992 after three years of testing in the towing tank, fluid dynamic calculations, and testing by top paddlers. It features more twist than usual and its shape gives a very efficient stroke with a clean catch and release.

This paddle will be sold in several sizes as the Braca XI and made to their high standards of strength, low weight, and excellent finish in quantities to meet the world demand.

Yours truly,

Ted Van Dusen
